Project co-funded by the European
Union Horizon 2020 research and
innovation programme GA 1010324450

The Objective

ePLANET is a three-year project aiming to deploy a new **clustering governance model for Energy Transition** based on a digital framework, allowing to share harmonized information and to facilitate the adoption of coordinated energy transition actions by the European public sector.

In particular, the project will provide local and authorities with an improved governance model to enhance decision-making and deployment of Energy Transition plans.

The Testing process

ePLANET includes a proof-of-concept of the solutions. This phase ensures the correct deployment of tools and effective focus on real needs of public authorities, by validating them in three European pilot regions.

The Replicability

ePLANET will widen the project impact by scaling up project achievements into the whole region territories of the pilot sites, and by supporting the integration of project results in other European regions, including some follower regions.

3 PILOT REGIONS

- Girona region (CAT)
- Zlín region (CZ)
- Crete island (GR)

7 FOLLOWER REGIONS

- Agency for Energy Efficiency and Environmental Protection (RO)
- South East Energy Agency (IE)
- Black Sea Regional Agency for Energy Management (BG)
- Regional Development Fund of Central Macedonia (GR)
- Regional Council of Baix Llobregat (CAT)
- Municipality of Fily (GR)
- Inter-municipality community of Tâmega e Sousa (PT)

1 SHARING INFORMATION PLATFORM

The ePLANET platform allows digitalization of European **Energy Action plans** and related energy transition measures, including data harmonization following an ontology approach to identify relations between different elements of the available data, data visualization and information sharing within selected clusters.

The Expected impacts

603

Memorandums of Adhesion

Institutionalised collaboration on the Energy Transition between public authorities and ePLANET.

764

Stakeholders

Trained and active in delivering the energy transition.

129

GWh

Primary energy savings triggered by the project

7

Million €

Investment in sustainable energy triggered by pilot regions in the project

XARXA D'AUTORITATS PÚBLIQUES LOCALS PER A L'IMPULS DE LA TRANSICIÓ ENERGÈTICA

Resultats

- **Estratègia de “clustering governance” per a la Transició Energètica** (→ PATER a Catalunya)
- **Plataforma per a la gestió i monitoratge de PAESC** (fase final, desplegament)
- **Repositori de bones pràctiques i solucions per a la Transició Energètica** (en desenvolupament)
- **Webinars i workshops de capacitació i sensibilització** (en curs, Girona → Catalunya)
- **Disseminació via articles, publicacions, participació a conferències**

Difusió en el darrer semestre de

The screenshot shows the ePLANET website interface. At the top, there is a navigation menu with links for 'Inici', 'Projecte', 'Open Call', 'Notícies', 'Recursos', and 'Contacte', along with a language selector for 'Català' and a search icon. Below the navigation, there is a button labeled 'TOTES LES NOTÍCIES'. The main content area features a light blue background with the text: 'Si no et vols perdre cap informació del **projecte ePLANET**, subscriu-te a la nostra newsletter.' Below this text is a button labeled 'SUBSCRIURE'M'. At the bottom of the page, there is a footer with the European Union flag on the left and a disclaimer on the right: 'El **projecte ePlanet H2020** ha rebut finançament per part del programa de recerca i innovació Horizon 2020 de la Unió Europea en virtut de l'acord de subvenció núm. 101032450.
