

PRESS RELEASE

JULY 2024

Local governments collaborate to drive the energy transition

Local and regional authorities play a pivotal role in the EU's mission to achieve carbon neutrality by 2050. Their decentralised governance structures allow for direct engagement with citizens and stakeholders, crucial for fostering a community-based clean energy transition.

Local and regional authorities play a pivotal role in the EU's mission to achieve carbon neutrality by 2050. Their decentralised governance structures allow for direct engagement with citizens and stakeholders, crucial for fostering a community-based clean energy transition. However, the effectiveness of these efforts is often limited by a lack of coordination and fragmented information sharing across regions.

ePLANET project empowers municipalities to drive ambitious climate action by fostering strong partnerships, accelerating the energy transition through collaborative governance, and achieving a sustainable energy future.

The ePLANET Joint Agreement

We invite all European local and regional authorities to support this mission by signing the [ePLANET Joint Agreement](#), which strengthens this ecosystem, driving collective action and achieving shared energy transition goals.

This agreement formalises the commitment of local and regional authorities to engage in coordinated energy transition actions through the ePLANET project's innovative "clustering governance" approach. By signing the agreement, public authorities pledge to use ePLANET's digital tools to share harmonised information, enhance decision-making, and ensure consistent implementation of renewable energy initiatives.

The key features of the ePLANET Joint Agreement include:

- Harmonised Information Sharing: Establishing a transparent framework for data exchange among public authorities.
- Digitalisation of Energy Plans: Facilitating the digitalisation of energy transition plans to improve coherence and coordination.
- Enhanced Governance: Supporting multi-level governance by integrating local and regional actions with broader EU energy policies.

Join the ePLANET community, sign our Joint Agreement!

With over 250 public authorities already committed, you can join a collective effort to accelerate the energy transition. By signing, your organisation can contribute to a unified and effective approach to achieving a sustainable energy future.

Join us in this vital initiative to enhance collaboration and drive the energy transition forward. Sign the ePLANET Joint Agreement [here](#).

ePLANET project

The project started in September 2021 and will last for 3 years. The consortium is composed of 10 partners from 6 countries (Catalonia, Czech Republic, Greece, Germany, Belgium and France).
